

Delta Translator® 2.0 Spanish Brazilian Portuguese

Visit our web site for even more information: <http://www.deltatranslator.com>

Fact Sheet

Delta Translator® 2.0 for Spanish < > Brazilian Portuguese contains numerous features that make translating from Brazilian Portuguese to Spanish or Spanish to Brazilian Portuguese both fast and easy directly on your own Windows® computer. Delta Translator® 2.0 translates **directly** from Brazilian Portuguese to Spanish or Spanish to Brazilian Portuguese. Most other translation programs use English as a “go between”—first translating the Brazilian Portuguese text to English, and only then from English to Spanish or vice-versa. Obviously, this adversely affects the quality of any translation.

Don't make a costly mistake with other translation programs that offer different versions, levels and prices or only include Portuguese as part of a multi-language package and may not even be Brazilian or might not provide true automatic machine translation. There's only one Delta Translator® and it does it all—and more. Discover what it can do for you!

What is Delta Translator®?

Delta Translator® 2.0 is an automatic, bi-directional machine translation software system that quickly translates documents, letters, memos, faxes, reports, manuals, booklets, publications, spreadsheets, e-mail and even web pages as you browse the Internet. In fact, Delta Translator® 2.0 is so versatile it can translate virtually any text displayed in any Windows® application or program. It's the most accurate, sophisticated, flexible and easiest to use Brazilian Portuguese < > Spanish machine translation system available in the world today.

Who Can Use It?

If you have a need to translate Brazilian Portuguese to Spanish and/or Spanish to Brazilian Portuguese, Delta Translator® is for you. Delta Translator® is the best selling translation software in Brazil because of its accuracy, speed, flexibility and ease of use. It's ideal for either personal or business use, for language students, professional translators or anyone in between. With Delta Translator®, you can communicate and understand even if you don't know a word of Portuguese! Today, Delta Translator® is used by tens of thousands of individuals and large and small companies and organizations around the world.

How Does it Work?

The Delta Translator® 2.0 translation system contains three different programs to meet different translation situations:

- **Delta Translator®**—the main program, translates already existing documents, text copied and pasted from other Windows® applications and programs or text typed directly into the program's upper window (Translation Area). Just click a single button and, within seconds, the translated text appears in the lower window (Translated Text Area) while maintaining the formatting of the original document. Delta Translator® also includes numerous post-translation tools to help you refine and polish your translations.
- **Delta Windows® Translator**—translates text directly inside all your Windows® applications and programs including word processing, spreadsheet and e-mail programs. To use it, just highlight the text you want to translate and press a simple hotkey combination to start Delta Windows® Translator. Within seconds, the original text is replaced with the translation.
- **Delta Web Translator**—translates web pages as you browse the Internet while maintaining all original formatting. When loaded, an easy to use interface window is displayed on your screen. Delta Web Translator only translates text, not graphics or pictures. Many web pages contain titles, subtitles, bullet points, buttons, navigation tabs, etc., that may contain or look like text but which are, in reality, graphics (pictures). No translation system in the world translates such graphics.

Delta Translator® 2.0 only installs a Portuguese interface—command buttons, interactive messages, Windows®, help file, etc.

How Fast is It?

While Delta Translator's speed is directly dependent on the speed and memory resources of your computer, most often and for most text, Delta Translator's translation time is measured in seconds not minutes. Delta Translator® can translate a paragraph in a few seconds, a one page letter in less than thirty seconds, a typical web page in less than a minute or a multi-page document in a few minutes. There is no faster machine translation system in the world. It doesn't matter what you are translating, Delta Translator® will save you time.

How Flexible is It?

Delta Translator's language database is fully customizable so you can add any number of your own new words, phrases and translations. Translated words and phrases that have alternative translations are clearly marked. You can quickly and easily view alternate translations and select one or add your own new translation. Translations for words and phrases whose translation (because of language ambiguities) may be doubtful are clearly indicated. The program also contains numerous helpful features including:

- Convenience** — translates directly on your own computer without an Internet connection or other encumbrance
- Flexibility** — translates documents, spreadsheets, e-mail, web pages as you browse the Internet or any text in any Windows® program
- Speed**—translates a paragraph in a few seconds, a page in less than thirty seconds or a multi-page document in a minute or two—more than 100,000 words per hour, the fastest translator on the market. This speed is based upon test with a Pentium® III, Windows® '95 computer running at 500 MHZ with 64 MB RAM memory. Newer, more powerful machines will translate even faster.
- Accuracy** — the largest language database available anywhere with specialized language for many fields
- Ease of Use** —simple, logical and straightforward interface for all operations—a few mouse clicks is all it takes
- 100% Brazilian** —including idioms, slang and colloquial usage—unlike most other programs that use European Portuguese
- Bi-directional** —to and from Portuguese and Spanish
- Word and Phrase Editors** —to quickly customize the database with your own words, phrases and translations create your own new dictionary database(s)—quickly create separate customized translation databases
- Spell Checkers** —to help you to spell check in either language
- Grammar Checker** —to help you with Portuguese grammar
- Correction Assistant** —to help you make corrections and refine translations
- Thesauruses** —Portuguese and Spanish—including synonyms and antonyms
- Inflections and Conjugations** —quickly look up Portuguese inflections and conjugations
- Semantic Assistant** —to help you select just the right translation
- Point and Correct** —just point and click for help you select the right translated word
- Conversation Module** —to quickly translate short phrases and sentences—to converse while sitting at the same computer
- Advanced Text-to-Speech Voice Synthesizers** —to actually hear any text in Portuguese or Spanish!
- Free Database Updates** —to periodically update your database quickly and easily via the Internet
- Network Ready** —for installation and use on networks (with multi-user/network license)
- Free Bonus Software** —English Works Gold 2.0 *Special Edition* free with your purchase Delta Translator®

How Big is the Language Database?

Delta Translator's database contains literally tens of thousands of words, phrases and corresponding translations including specialized language for sports, electronics, computers, economics, medicine, biology, law and more. Delta Translator® contains the largest language database of any similar program on the market. Additionally, one of Delta Translator's ongoing benefits is periodic free database updates via the Internet so, as you update the database, you will add even more new words and expressions/phrases to your translation database. Free database updates are available as long as the version in use is the most current release.

User Interface

Delta Translator's interface is logical, straightforward and easy to use. Delta Translator® only installs with a Portuguese interface—command buttons, interactive messages, Windows®, etc. Additionally, an extensive Portuguese help file is provided that will help you quickly and successfully use all the program's functions.

Free Database Updates

Registered users can periodically update their database via the Internet. You can update at any time of the day or night. It's fast, easy and free. By updating the database, you will add new words and expressions/phrases to the dictionary as well as new grammar rules, etc., that will improve the quality of all your translation work.

Award Winning

INFO Exam magazine, the premier computer science magazine in Brazil, compared all automatic machine translators on the market and voted *Delta Translator®* its *Choice of the year* citing that "***Delta Translator® deserves to be INFO'S Choice because it provides reasonable translations and includes numerous extra resources. It is the most flexible program because, unlike other programs, it doesn't set itself up with just a single word processor. It can be used with any Windows® program.***"

System Requirements
