

Delta Translator 3.0 English Brazilian Portuguese

Visit our web site for even more information: <http://www.deltatranslator.com>

Fact Sheet

Delta Translator® 3.0 for English < > Brazilian Portuguese contains numerous features that make translating from Brazilian Portuguese to English and English to Brazilian Portuguese both fast and easy directly on your own Windows® computer. Delta Translator® is faster, more accurate and powerful, more sophisticated, easier to use and allows far better control over translations than any "free" Internet translator ever could—and all for less than a single night out on the town.

Don't make a costly mistake with other translation programs that offer a confusing variety of different versions at different prices or only include Portuguese as part of a multi-language package that may not even be Brazilian. And don't confuse Delta Translator® with other programs that do not provide true automatic machine translation. There's only one version of Delta Translator® and it provides everything you need to translate between Brazilian Portuguese and English and more. Discover what thousands of other satisfied users already know.

What is Delta Translator?

Delta Translator® 3.0 is an automatic, bi-directional machine translation software system that quickly translates documents, letters, memos, faxes, reports, manuals, booklets, publications, spreadsheets, e-mail and even web pages as you browse the Internet. In fact, Delta Translator® is so versatile it can translate virtually any text displayed in any Windows® application or program. It's the most accurate, sophisticated, flexible and easiest to use Brazilian Portuguese < > English machine translation system available in the world today.

Who can use it?

If you have a need to translate Brazilian Portuguese to English and/or English to Brazilian Portuguese, Delta Translator® is for you. It's become the best selling translation software in Brazil because of its accuracy, speed, flexibility and ease of use. It's ideal for either personal or business use, for language students, professional translators or anyone in-between. With Delta Translator®, you can communicate and understand even if you don't know a word of Portuguese ... or English! Today, Delta Translator® is being used by tens of thousands of individuals and large and small companies and organizations around the world.

How Does it Work?

The Delta Translator® 3.0 translation system contains three different programs to meet different translation situations:

- **Delta Translator**—the main program, translates already existing documents, text copied and pasted from other Windows® applications and programs or text typed directly into the program's upper window (Translation Area). Just click a single button and, within seconds, the translated text appears in the lower window (Translated Text Area) while maintaining the formatting of the original document. Delta Translator® also includes numerous post-translation tools to help you refine and polish your translations.
- **Delta Windows Translator**—translates text directly inside all your Windows® applications and programs including word processing, spreadsheet and e-mail programs. To use it, just highlight the text you want to translate and press a simple hotkey combination to start Delta Windows Translator. Within seconds, the original text is replaced with the translated text.
- **Delta Web Translator**—translates web pages as you browse the Internet while maintaining all original formatting. When loaded, an easy to use interface window is displayed on your screen. Delta Web Translator only translates text, not graphics or pictures. Many web pages contain titles, subtitles, bullet points, buttons, navigation tabs, etc., that may contain or look like text but which are, in reality, graphics (pictures). No translation system in the world translates such graphics.

Delta Translator® will install either an English or Portuguese interface—command buttons, interactive messages, windows, help file, etc.—depending upon the language used by the Windows® operating system.

How Fast is It?

While Delta Translator's speed is directly dependent on the speed and memory resources of your computer, most often and for most text, Delta Translator's translation time is measured in seconds not minutes. Delta Translator can translate a paragraph in a few seconds, a one page letter in less than thirty seconds, a typical web page in less than a minute or a multi-page document in a few minutes. There is no faster machine translation system in the world. It doesn't matter what you are translating, Delta Translator® will save you time.

How Flexible is It?

Delta Translator's language database is fully customizable so you can add any number of your own new words, phrases and translations. Translated words and phrases that have alternative translations are clearly indicated. You can quickly and easily view alternate translations and select one of these or add your own new translation. Translations for words and phrases whose translation (because of language ambiguities) may be doubtful are also clearly indicated. Delta Translator® contains numerous helpful features including:

Convenience—translates directly on your Windows® computer without the need for an Internet connection, worry about daily word or text size limitations or any other encumbrance

Flexibility—translates documents, letters, reports, manuals, spreadsheets, e-mails, web pages as you browse the Internet or any text in any Windows® program

Speed—translates a paragraph in a few seconds, a page in less than thirty seconds or a multi-page document in a minute or two—more than 100,000 words per hour, the fastest translator on the market. And this speed is based upon a Pentium® III, Windows® '95 machine running at 500 MHZ with 64 MB of RAM memory. Newer computers and Windows® operating systems are even faster.

Accuracy—the largest language database available anywhere with specialized language for many fields

Ease of Use—simple, logical and straightforward interface for all operations—a few mouse clicks is all it takes

100% Brazilian—including idioms, slang and colloquial usage—unlike almost all other programs that use only European Portuguese or mix Brazilian Portuguese with European Portuguese and call it all Portuguese

Bi-directional—to and from Brazilian Portuguese and English

Word and Phrase Editors—to quickly customize the database with your own words, phrases and translations—create your own new dictionary database(s) or quickly create separate, customized subject databases

Spell Checkers—to spell check in either language, Brazilian Portuguese or English

Grammar Checker—to help you with Brazilian Portuguese grammar

Correction Assistant—to help you make corrections and refine translations

Thesauruses—for Brazilian Portuguese and English—including English synonyms and antonyms

Inflections and Conjugations—to quickly look up Brazilian Portuguese inflections and conjugations

Semantic Assistant—to help you select the semantically correct word

Point and Correct—just point and click to help you select just the right translation

Conversation Module—to quickly translate short phrases and sentences while sitting at the same computer

Advanced Text-to-Speech Voice Synthesizers—to actually hear any highlighted text within the program in either Brazilian Portuguese or English

Free Database Updates—to periodically update the program's database quickly via the Internet

Network Ready—for installation and use on networks and Intranets (with multi-user/network license)

Free Bonus Software—English Works Gold 2.0 *Special Edition* included free with your purchase

How Big is the Language Database?

Delta Translator's database contains literally tens of thousands of words, phrases and corresponding translations including specialized language for sports, electronics, computers, economics, medicine, biology, law and more. Delta Translator® contains the largest language database of any similar program on the market. Additionally, one of Delta Translator's ongoing benefits is periodic free database updates via the Internet so, as you update the database, you will add even more new words and expressions/phrases to your translation database.

User Interface

Delta Translator's interface is logical, straightforward and easy to use. Delta Translator® will install either an English or Portuguese interface—command buttons, interactive messages, windows, etc.—depending upon the language used by your Windows® operating system. Additionally, an extensive help file is provided that will help you quickly and successfully use all the program's options and functions.

Free Database Updates

Registered users can periodically update their database quickly via the Internet. You can update at any time of the day or night. It's fast, easy and free. By updating the database, you will add new words, expressions and phrases to the database as well as new grammar rules that will improve the quality of all your translation work. . Periodic free database updates are available as long as the version in use is the most current release.

Award Winning

INFO Exam, the premier computer magazine in Brazil, compared all automatic machine translators on the market and voted *Delta Translator* its *Choice of the year* citing that "***Delta Translator deserves to be INFO'S Choice because it provides reasonable translations and includes numerous extra resources. It is the most flexible program because, unlike other programs, it doesn't set itself up with just a single word processor. It can be used with any Windows program.***"
